

The 3rd Webinar for Quantitative Genetics Tools for Mapping Trait Variation to Mechanisms, Therapeutics, and Interventions

Introduction to expression (e)QTL and their role in connecting QTL to genes and molecular networks

Friday, June 12th

10am PDT/ 11am MDT/ 12pm CDT/ 1pm EDT

1 hour presentation followed by 30 minutes of discussion

Presented by:

Dr. Laura Saba

Associate Professor
Department of Pharmaceutical Sciences
University of Colorado Anschutz Medical Campus

There is no fee associated with this webinar, but users are asked to register to receive the Zoom link and password.

Registration: https://bit.ly/osga_2020-06-12

Goals of this series:

Transverse the path from trait variance to QTL to gene variant to molecular networks to mechanisms to therapeutic and interventions

Goals of this webinar (QTL to gene/molecular networks):

- Define eQTL
- Examine the role of eQTL in the relationship of genes and molecular networks with phenotypic QTL
- eQTL for co-expression networks

Sponsored by:

The NIDA Center of Excellence in Omics, Systems Genetics, and the Addictome
